## PREFACE

The increase in numbers of children being identified and classified as Educable Mentally Retarded has established the need for a program for these children which will provide a long range developmental sequence of skills and knowledge that will prepare them for the real world. We are faced with the obligation of developing a program that will successfully carry them from the first through the twelfth grades and into their vocational and social life. We need to prepare these children in four areas of adequacy; Personal, Social, Academic, and Vocational.

It was our aim to establish a curriculum development set-up in a fashion which would allow for change as time and experience warrant. Teachers in the field are often the best sources of methodology and materials. We hope you will contribute your ideas to this work.

Your involvement in the development of this curriculum is highly sought. We have established the form which is to be followed, that is, stating the objectives in behavioral terms. This in itself has proven to be an invaluable lesson for us. Behavioral objectives strive to present in a simple, clear, and readily understandable terms the specific objective the student should be able to reach somewhere in his learning continuum. Since behavioral objectives lend themselves quite easily to the academic areas of learning, this presented no problem. The social skills, however, are often difficult to present so as to meet the criteria for behavioral objectives. In some instances, we have placed social skills in terminal behavior. Terminal behavior is defined as that behavior which is a logical outgrowth and culmination of previous objectives.

You will find that much of our methodology is relevant to the objective, but you will also find that you have some ideas which better serve the objective. Our methods are suggested; you are sought by us to increase the functioning of all teachers. More and more, we are realizing the validity of the statement that all children are individuals. Methodology needs to change with the individual child, class, and teacher. The more methods we have, the better we can implement these objectives.

Materials are also presented, but again in a relatively brief outlined manner. You again are the individuals who produce and recognize usable materials. Please share these with others. It is part of your responsibility toward all children to share ideas and materials with others in the field.

We have established the ground work for this guide. We have set up a continuum for development. We have established behavioral objectives as our method of presentation. This has been no small task. We now need your cooperation and knowledge. The students who are seeking guidance and help from all of us are in need of your help.

**WE BELIEVE**

THAT the guardianship of public education is a trust and an obligation. That the goals of education are fundamentally the goals of a democracy and an introduction into the workings of a republic. In a deeper sense by affording full recognition to our republic we are acknowledging the duty, discipline, and responsibility demanded of all citizens.

THAT members of the Board of Public Instruction are elected representatives of the people to whom the schools belong.

THAT the Board of Public Instruction is a policy-making body responsible for financing quality education, evaluating the total school program, and communicating with their sovereign peers--namely, the people.

THAT the Superintendent and his staff are the executive officers of this school system and their responsibility is to make recommendations to the Board of Public Instruction and carry out Board policy.

THAT we are living in an ever-changing world and that education must be subject to change to meet the challenges of today and tomorrow.

THAT the quality of education in our school system is directly related to the quality of our teachers and to the financial support of the people.

THAT teaching is a profession and that our teachers, accordingly, should be dealt with as professionals and the proper environment should be provided in our system so that the talents of our teachers may be fully realized.

THAT noninstructional personnel are a vital part of our total school program and that their services should be rewarded commensurate with their abilities.

THAT an active and purposeful school program must be directed toward the common needs of all youth regardless of race, religion, or socioeconomic status and that we recognize and must consider the unique differences and needs of each individual.

THAT pupils are the most important resource in our school system and that we have a definite responsibility to make available to them opportunities to develop the skills, habits, attitudes and character traits essential to rich personal living which will enable a sound choice of and effective participation in a vocation, a concept of human relationships based on mutual recognition of common interests and produce responsible, contributing citizens.

THAT education is a local function, a state responsibility, and a national concern.

## PURPOSE

In Palm Beach County it is the purpose of the Board of Public Instruction to understand and provide for the needs of every child. In order to provide continuous teaching of the basic skills and tools of learning, we will make available a wide range of learning experiences.

By so doing, we will stimulate the intellectual curiosity, promote the intellectual inquiry, and develop rational powers and analytical thinking to effect continuous learning on the part of every boy and girl throughout his lifetime.

We will provide for children according to their varying needs, interests, abilities and levels of learning capacities.

By cooperating with the home, church, and other community agencies, we will do our best to develop each child to his ultimate physical, social, moral, spiritual and mental potential.

We herein dedicate our efforts to develop citizens who are effective in a democratic society as embodied under our republican form of government and in our American way of life.

## INTRODUCTION

### JUNIOR AND SENIOR HIGH SCHOOL

It can be said that all education is the process of survival training. We learn what we need to know to survive in our society on a level which either we set for ourselves, or which has been set for us by society at large. The greater the pressures of society, the greater the need for survival, the more we are in need of functional educational programs.

The E.M.R. child especially needs this "survival training". By adjusting our aims and curriculum to suit his special needs, we are, in essence, giving him an opportunity to rehearse for life situations. From past experience we can readily see that these children can survive and flourish under a variety of circumstances.

The curriculum we have set forth in this section is by no means complete or definitive. It is a direction to be followed which we feel will benefit the children. Your assistance and cooperation is needed to continue what we have started. During the time you use this guide, we urge you to make additions, revisions, and deletions. Change for the better can only be brought about through cooperative effort.

As previously stated, this guide has been established on the basis of behavioral objectives. On the junior and senior high school levels, it is the intention of the guide to provide a basis of instruction which will prepare the student for an active, participating, and contributing membership in his community. The behavioral goals emphasize personal development, social responsibility, academic achievement, and vocational competency. It is the responsibility of the Occupational Education teacher in the high school setting to plan a schedule for each student which will allow for the Occupational Education class and off-campus work to be fitted into the total program.

**GENERAL OBJECTIVES**  
(Junior High Level)

A pupil who has completed the Junior High should exhibit the following:

1. The student should be able to distinguish and interpret environmental signs pertinent to his health and safety.
2. The student should show an awareness of an ability to adjust to his body's physical needs.
3. The student should be able to select appropriate apparel and to manifest acceptable manners in social, academic, and vocational situations.
4. The student should demonstrate an awareness of time judgement for a variety of time spans.
5. The student should be able to demonstrate an awareness with regard to punctuality.
6. The student should become familiar with a variety of techniques for communicating thoughts necessary for his physical, mental, and emotional well-being.
7. The student should show an awareness of his rights, privileges and responsibilities as an active member of the home, school and community.
8. The student should demonstrate an awareness of the responsibility for self-assumed and group tasks and should exhibit an appreciation for the value of cooperative activity.
9. The student should be able to follow oral and written instructions involving directionality.
10. The student exhibit a knowledge of functional mathematics.
11. The student should demonstrate an awareness of people and agencies available for his well-being.
12. The student should demonstrate an interest in and a use of leisure time.

**GENERAL BEHAVIORAL OBJECTIVES**  
**(Senior High)**

1. The student will demonstrate a functional use of the means of communication.
2. The student will demonstrate the ability to complete essential forms and applications necessary to our data-oriented society.
3. The student will demonstrate functional arithmetic skills necessary to practical living in our society.
4. The student will exhibit a functional knowledge of the techniques of seeking and holding a job.
5. The student will cooperate with advisors and co-workers.
6. The student must be able to accept criticism and/or direction from his employer and/or those in authority.
7. The student exhibits a working knowledge of consumer techniques.
8. The student should be able to perform consistently and accurately in relation to time judgment for a variety of time spans.
9. The student shall demonstrate the ability for involvement in his expanding and changing world.
10. The student shall be able to demonstrate positive techniques of social interaction.
11. The student shall demonstrate the utilization of established avocational activities.

## SAFETY IS YOUR JOB

## I. Introduction

The need for safety is always present. Safety is the responsibility of every one in the home, school, and community.

In teaching safety, we must emphasize the positive factors in our daily living. We must guard against instilling fear; instead, we must create desirable habits and attitudes that help students become responsible citizens working for their own safety as well as the safety of others.

## II. PURPOSE

Safety is studied for the protection of ourselves and others and to avoid injury, loss of life or loss of property.

## III. GENERAL OBJECTIVES

1. The student should be able to distinguish and interpret environmental signs pertinent to his health and safety.
2. The student should demonstrate an awareness of people and agencies available for his well-being.
3. The student should be able to follow oral and written instructions involving directions.
4. The student should show an awareness of his rights, privileges and responsibilities as an active member of the home, school, and community.

## IV. BEHAVIORAL OBJECTIVES

1. Given a series of twenty pictures which includes ten traffic regulatory signs, the student identifies and names at least seven of the traffic regulatory signs.
2. Given four pictures depicting a funnel cloud, a barometer falling, cracked earth, and a picture of a hurricane warning, the student identifies and names each picture according to the weather conditions it suggests.
3. Given a list of agencies located within the city pertinent to the students well-being the student will locate each of the agencies on a city map. (Social Security Office, Employment Office)

## V. METHODS OF APPROACH (the methodology will cover three areas--the home, school, and community)

1. Present to the class flashcards on which are printed each safety caution sign. These cards should be presented in group order. Arrange the grouping according to the following headings:
  - a.) Common Road Signs
  - b.) Common Warning Signs
  - c.) Common Signs Placed in Working Situations
2. Have students pronounce each sign as it is presented to them. Encourage discussion as to where each sign is located or any other information the student can give relating his knowledge with the sign.

3. Have the students make a vocabulary listing of each sign.
4. Have the students spell and make short sentences using each word taken from the vocabulary list or dictated by the instructor.
5. Show films or filmstrips on road safety. After each film session, hold a discussion on what was learned from the films.
6. Prepare a bulletin board to go along with the class discussion (i.e., at the time road signs are being discussed, have pictures of the different regulatory signs on the board to be viewed by students). Make the print large to enhance readability.
7. Encourage discussion on topics of safety. The discussion should include:
  - a) Fire Prevention in the Home
  - b) Preventing Accidents
  - c) Making the Home Safe for Children and Adults
  - d) First Aid in the Home
8. Occasionally practice fire drills and remind students of exits to be used. Review security information provided for the students by the school.
9. Have students familiarize themselves with hurricane and security drills.
10. Review rules of caution with students concerning shop area, laboratories, gymnasium and pool. Prepare a list of these rules and have them posted inside the classroom to remind students (in bright colors--appealing to the eye). Prepare copies for each student. See that the student keeps the copies with him every day.
11. Make a listing--with the help of students--of all community agencies and services geared towards our protection (Fire Department, Health Department, Police Department).
12. Using a city map, locate the agencies and/or services. Use colored tacks for markers and plot off each agency. Make sure the city map is large and the writing is done in huge print. (This type of map might have to be hand made by taking a regular city map and having it enlarged about the size of the average bulletin board).
13. Have students locate these agencies by using the telephone directory. Let each student make "memo" booklets of addresses and telephone numbers of these agencies that are nearest his home. Make a directory of agencies to be kept and used in the classroom.
14. Collect pictures of the policeman, fireman, Highway Patrol. Show the pictures to the class and talk about the duties and responsibilities of each.
15. Invite person representing the various agencies and have them relate their experiences to the class, talk about their duties and responsibilities as well as to discuss the responsibility of the student to them.
16. Present to the class pictures depicting a funnel cloud, a barometer falling, cracked earth, and a picture of a hurricane warning. Discuss each picture by talking about the weather conditions it suggests.
17. Have students locate pictures representing the above and discuss the weather condition to which they are related.
18. Visit a weather station and ask the person in charge to discuss instruments used in tracking down weather conditions.

19. Plan visits to other agencies pertinent in helping us maintain our health and safety.
20. Make extensive use of The Florida Driver's Handbook. Have students learn traffic signs in the book.

## VI. ACTIVITIES

1. Collect newspaper articles concerning accidents. Discuss the type of accident, how it could have been prevented, the cost of accidents in terms of money, life, property and disabilities.
2. Invite guest speakers.
3. Contact life insurance companies for free bulletins on accidents and accident prevention.
4. Have students survey school, home and community to determine safety hazards.
5. Allow students to give demonstrations showing the correct use of tools, machinery, electrical equipment and knives.
6. Have students draw maps of their immediate community spotting hazardous places and safe routes to school.
7. Have students practice the correct way to report fires, to contact an emergency ambulance, or to notify the police.

#### VIII. Evaluation

Give three tests. Base each test on the behavioral objectives. (See page 1)

## LESSON PLANS

### UNIT: SAFETY IS YOUR JOB

#### PURPOSE:

This lesson plan is organized to create desirable habits and attitudes that will help students become responsible citizens working for their own safety as well as the safety of others.

It has been prepared to cover a block period for two days.

The area of concentration will be on the first behavioral objective, "Given a series of twenty pictures which includes ten traffic regulatory signs, the student identifies and names at least seven of the traffic regulatory signs".

Make sure the students understand each step before moving to new ideas or new rules.

#### INTRODUCTION

1. The teacher will introduce the new unit to the class.
2. The teacher will explain to the class what the unit will cover, and what new experiences she hopes the unit will give to them.
3. The teacher will ask for questions from the students concerning the unit.
4. The teacher will ask the student to give relevant ideas and suggestions that will aid her in teaching the unit.

#### DAY ONE

1. The teacher will present to the class flashcards on which are printed each safety caution signs. Each time the cards are presented, she will pronounce the names of each sign.
2. The teacher will repeat the above; however, this time the students will pronounce the names with her.
3. The teacher will call on students individually to name the cards as they are shown to them.
4. The teacher will randomly select the cards, show them to the students and call on an individual to name and identify the signs.
5. Once the students have mastered naming and identifying the signs, the teacher will encourage discussion as to where each sign is located or any other information student can give relating his knowledge about the signs.
6. Have students make a vocabulary listing of all signs.
7. Have students to take each word in the vocabulary list and make short sentences using each word taken from the list.
8. Have students look in magazines and find safety signs being discussed. Cut them out and prepare a bulleting board to be used for future reference.

#### DAY TWO

1. The teacher will write on the chalk board three headings: a. Common Road Signs,

**b. Common Warning Signs, C. Common Signs Placed in Working Situation**

Have students select the signs that are to be placed under each of the three headings. Have the students copy the headings along with the signs under each and instruct them to keep a copy in their notebooks for future references.

2. Pass out copies of the Florida Driver's Handbook. Have students to locate traffic regulatory signs in the book.
3. Show selected films or filmstrips concerning the safety signs. Discuss the films.
4. Give the students a series of twenty pictures on a mimeographed sheet. The pictures will consist of twenty pictures of which ten are traffic regulatory signs. The student is given instructions to circle the ten traffic regulatory signs.

## **JUNIOR HIGH VOICE AND DICTION**

(Time approximately one to three weeks) depending on involvement and depth and student ability to grasp material.

**Introduction:** An expressive voice and clear correct speech are vital assets in all aspects of life.

Personnel directors list voice and diction as top priority in meeting the public and sharing ideas.

It is the major objective of this unit to provide an understanding of our voice mechanism, practice in breathing exercises to relax our voice, and constant awareness of our speech in order to improve vocal and speech habits.

The major unit has been divided into five mini-units. These five areas include:

- A. VOCAL TRACT**
- B. BREATH CONTROL**
- C. VOWEL SOUNDS**
- D. CONSONANT SOUNDS**
- E. PRONUNCIATION**

The format includes title, terminal objectives, procedures, suggested materials and assessments.

**Title: VOCAL TRACT**

**B.O.:** Given a diagram of the vocal tract and a corresponding list of parts, the student names and identifies at least five of the following: diaphragm, trachea, larynx, tongue, lips, teeth mouth, nasal cavity, soft and hard palate.

**Procedure:** Prepare a transparency illustrating a diagram of the vocal tract, including: diaphragm, trachea, larynx, tongue, lips, teeth, mouth, nasal cavity, hard and soft palate.

Present each student with a diagram (mimeographed) of the vocal tract. Place your transparency on the overhead projector. As you point to the parts on the diagram, the student locates and marks them on his mimeographed sheet.

Present an anatomical model to the class: This way the students can see the shape and location of each part in relation to the total body, use the model available from the ITV center or, if you are part of a Senior High, use the one in the biology department.

**Suggested Material:** Anatomical model, mimeographed sheets outlining vocal tract, overhead projector.

**Evaluation:** Prepare a test as stated in the Behavioral Objective.

**Title: Breath Control**

**Behavioral Objective:** Given a selection with which he is familiar and instructed to read as far as he can on one breath, the student takes a deep breath and reads the selection as far as he can without drawing a second breath.

**Procedure:** In speech breathing there is a very brief inhalation and a slow, more controlled exhalation period.

Explain and demonstrate the following exercises to the student. Check each child to see if he is performing the exercise correctly.

Have the students practice the following breathing exercise:

1. Place your hands on both sides of your rib cage and pant in quick succession.
2. Stand straight with an easy and well balanced posture. Inhale slowly. Make sure from the feeling under your hands that the whole rib cage is expanding. Then exhale slowly and evenly while you mentally count, gradually increase your count to fifteen seconds. Avoid muscular tension.
3. Yawn freely; acquire the feeling of an open relaxed throat.
4. Let your head fall forward on your chest. Lift it up and back, letting the jaw remain loose. Drop it again and slowly roll the head as though describing a circle.
5. Take in a deep breath, relax your jaw; think of your throat as large and exhale slowly.

**Suggested Material:** Present each student with a mimeographed sheet for the breathing exercises and a copy of a familiar poem or literature selection.

**Assessment:** Each student reads orally a selection with which he is familiar as stated in the behavioral objective.

**Title: Vowel Sounds**

**B.O.:** Given a passage from "The Rime of the Ancient Mariner" by Samuel Taylor Coleridge, and instructed to read it pronouncing each vowel clearly, the student reads the excerpt giving full value to every vowel sound.

**Procedure:** The vowel sounds may be classified as front, middle, and back vowels according to the position of the tongue as each is formed.

Provide the student with a mirror, let him see the various positions of his speech organs as he pronounces various vowel sounds in words. For example:

- a. feel, fill, fell, fall
- b. tea, tin, tan, ton
- c. cat, it, at, ought
- d. peak, pick, peck, pork

**Material:** Teacher constructed material, a copy of "The Rime of the Ancient Mariner."

**Assessment:** Read the excerpt below from the "Rime of the Ancient Mariner" giving full value to the vowel sounds:

"Water, water, everywhere,

And all the boards did shrink.

Water, water, everywhere,

Nor any drop to drink."

**Title: Consonant Sounds**

**B.O.:** Given an excerpt from "The Pied Piper of Hamelin" by Robert Browning, and instructed to read it pronouncing each consonant clearly the student reads the excerpt giving full value to the consonant sounds.

**Procedure:** The consonant sounds are made when air passage is obstructed at some point by the tongue, soft palate or lips.

The consonant sounds are:

**PLOSIVE**

**Voiceless**

p as in pop  
t as in tan  
c or k as in cane

**Voiced**

b as in Bob  
d as in dad  
g as in game

**Air is stopped by:**

Lip against lip  
Tip of tongue against upper gum ridge  
Back of tongue against soft palate

**FRICATIVE**

**Voiceless**

f as in fan  
s as in bus  
sh as in sure  
wh as in which  
th as in breath

**Voiced**

v as in van  
z as in buzz  
zh as in azure  
w as in witch  
th as in breathe

**Air passage narrowed by:**

Upper teeth on lower lip  
Front of tongue against upper and lower teeth which are almost closed  
Tip of tongue turned toward hard palate, teeth almost closed  
Sounded lips and raised tongue  
Tip of tongue against upper teeth

**Consonants**

m as in mummy  
ng as in sing  
n as in nina

**NASAL**

**Mouth closed by:**

Lip on lip  
Back of tongue on soft palate  
Tip of tongue on upper gums

**Materials:** Teacher constructed, a copy of "The Pied Piper of Hamelin." Read the excerpt giving full value to the consonant sounds.

**Assessment:** "Great rats, small rats, brown rats,

Brown rats, black rats, gray rats, tawny rats."

**Title: Pronunciation**

**B.O.:** Given a list of twenty-five words which are commonly mispronounced and having reviewed diacritical markings as presented in the dictionary, the student looks them up in the dictionary, marks them according to diacritical markings, and pronounces each word correctly before the class.

**Procedure:** Pronunciation entails the use of correct vowel and consonant sounds in words and the placing of the accent on the stressed syllables.

Review diacritical markings with the students. Present the students with ten words diacritically marked. Explain the markings, then ask the students to repeat pronunciation.

Review until students are able to pronounce correctly words given with these markings.

Remind the students that when they look up a word in the dictionary the first pronunciation is preferable, but the others are also in good usage.

Prepare a list of words for practice in syllable stress.

**Suggested material:** Teacher and student constructed mimeograph sheets.

**Assessment:** Present a test as stated in the Behavioral Objective based on the following 25 words.

UNIT: PREPARING A BUDGET

TIME: 3 WEEKS

I. PURPOSE:

The purpose of this unit is to present to the student the concept of budgeting his income with the knowledge of the items necessary to accomplish a sound budget arrangement.

A further aim is to develop in the student the understandings and attitudes conducive to financial responsibility in the real world.

II. BEHAVIORAL OBJECTIVE:

When presented with (1) a model budget which divides a weekly income in terms of percentages into areas of: food, clothing, shelter, medical care, transportation, insurance, entertainment, savings, and miscellaneous, (2) a definite weekly income to work with, the student will develop a budget and determine the amount of money to go into each area as stated in the model, using his total income for the week.

III. TEACHING PRECEDURES:

A. INITIAL MOTIVATING ACTIVITIES

1. Have the students develop a bulletin board display with pictures depicting the variety of ways in which they like to spend their money. The board should be limited to allow for an equal area to be devoted to the teacher's display.
2. The teacher should put on the bulletin board those pictures denoting the necessary expenditures in the real world. These pictures, taken possibly from magazines, should show situations with which the students can identify.
3. Have each student give an oral presentation to the class explaining the items he considers part of his weekly expenditures. These should be listed on the board for further discussion.
4. Develop an information center for pictures, books, and resource materials which are related to the subject of budgeting. Many private companies will send materials on request related to this area. These can be located in the EDUCATOR'S FILE OF FREE AND INEXPENSIVE MATERIALS, or Pepe's book FREE AND INEXPENSIVE MATERIALS.

B. DEVELOPMENTAL ACTIVITIES

1. Present to the class a glossary of terms which will be used in the unit. These should be written down in the student's notebooks. The presentation can be made either on the chalkboard or, if available, an overhead projector. Prepare the transparency in advance, but allow only one term at a time to be shown until the list is complete. Then review the entire list with the class. The list should include:
 

a. budget	b. financial responsibility	c. expenditures	d. deficit spending
e. credit	f. investments and dividend	g. consumer	h. income-earning

2. Present to the class a chart showing the three major sources of income. These present the major or entire source of money to be budgeted. Allow the students to suggest other means, but indicate that they are not dependable for the sake of establishing a budget. They may, of course, come up with some dependable means, but again do not include them in the budget.  
a. vocational activity b. savings on deposit c. investment dividends
3. Develop with the class a list of items which should be included in any budget arrangement. These items are standard, but the students need to think about them and develop the list themselves. a. food b. shelter c. clothing d. transportation e. medical care f. taxes g. savings h. insurance i. entertainment j. miscellaneous
4. Present a basic form for budgeting a weekly income. Develop variations of this form to account for bi-weekly and monthly salary schedules. The form should be presented in terms of percentages and actual income. (See attached form.)
5. Review with the class the concept of fractions and percentages. Allow for remedial teaching on this point. Do not go into any greater detail than is necessary for the understanding and development of functional operations in real situations. Use textbook materials or construct your own which will allow for the study of these points.
6. Give each student a copy of the budget form and have him indicate the areas into which the salary is to be divided. Work out a similar form on the board or on the overhead projector.
7. Have the class work out an average budget suitable for several different wage levels. Allow for individual differences as far as possible on items such as entertainment, shelter, transportation, and insurance.
8. Assign a specific sum of money to each student. This sum may be the same for all or different for each. The student should use the model the teacher has set up in percentage terms to determine his own budget.
9. Discuss the importance of savings as an integral part of the budget. The student needs to realize the value of establishing money reserves. Present situations in which the student will need money reserve. (i.e., unemployment, lay-offs, emergency medical treatment not covered by insurance, emergency expenditures on home or car.)
10. Present the concept of investment for capital growth and greater income. (letting money work for more money). The areas most open to small investment with little risk should be stressed most. This information can be obtained from a local bank or investment company. Usually a representative will gladly come to speak to a class and give first hand information.

11. Present any available films or filmstrips as a review session covering the unit. See the list of materials for suggested items.
12. Plan a class function which will require the expenditure of money. Assign the class the task of budgeting money for the various items needed. Small groups can each work on a segment of the function. (i.e. food, paper goods, favors or prizes)

C. ASSESSMENT ACTIVITIES

1. Give a short test based on the behavioral objective.
2. Application of the budget to the class function can be considered as a group assesment of the unit.

## LESSON PLAN

**UNIT: BUDGET**

**TIME: FIFTY MINUTES**

**OBJECTIVE:** When presented with an explanation of the new unit and asked to be located in magazines provided by the teacher the ways in which he spends his money, the student will locate and cut out at least three such pictures.

**PROCEDURE:** Upon entering the room the students will be told what the new unit will be. An explanation by the teacher and discussion by the class should follow.

After a short period of discussion, about 15 minutes, the teacher should divide the class into small work groups.

Present the groups with the task of locating pictures (in magazines provided by the teacher) which depict items or means by which the students spend their money. Time for this activity should be about 25 minutes.

Groups return to their seats and each student in turn shows the pictures he has selected. Limit discussion at this time. The discussion should take place only after all the students have presented their work. Allow about 10 minutes for this.

Assign students the task of mounting their pictures to be posted on the bulletin board so designed for their use.

**EVALUATION:** Students should each have located at least three pictures. Their assignment will be evaluated as homework for the next day.

**MATERIALS:** Provide the students with sufficient magazines to allow all to work at the same time.  
Provide construction paper for the mounting of the pictures.

5. Memory	3. Self-confidence	Give the students a construction task to perform involving a series of precise measurements which need to be done in order. The final product can come about only if each step is completed. i.e. the construction of ORIGAMI.	
6. Academic skills required for the task.	OCCUPATIONAL EDUCATION 1. Work habits 2. Organization of materials	Have the students construct a list of directions necessary to go from one place in the school to another and have the other student try to determine the exact location intended.	

**6. GENERAL OBJECTIVE:** THE STUDENT MUST BE ABLE TO ACCEPT CRITICISM AND/OR DIRECTION FROM EMPLOYER AND/OR THOSE IN AUTHORITY.

**TERMINAL OBJECTIVE:** Placed in a situation in which a substitute or intern teacher is in charge and given instructions to perform a task, sufficiently detailed to allow the student to complete the assignment, the student will perform the task without questioning the authority of the person in charge.

COMMUNICATIVE AND FUNCTIONAL SKILLS	SUBJECT AREA	SUGGESTED METHODOLOGY	MATERIALS
1. Adaptability	ENGLISH	Change in teacher program to allow variety in instructional staffing or presence of interns, aides, substitutes, or student teachers.	Role-playing situation as developed by the teacher/and/or student.
2. Oral and written communication	1. Oral communication 2. Written communication	Place a student in charge of a group's work within the confines of the classroom.	Since only the authority figure is changing, the academic materials in each class should remain the same as before.
3. Reaction to superiors	3. Reading for direction 4. Visual perception	Role-playing situations in which each individual has the opportunity to portray the leader or advisor.	
4. Emotional stability	SOCIAL STUDIES	Presentation of the governmental set-up in the local state and federal levels. Discussion of the presence of new leader periodically and the carrying on the business of government.	
5. Emotional security	1. Role of authority 2. Responsibility of worker and supervisor		
6. Self-confidence	3. Governmental establishment 4. Social pressures.		

**GENERAL OBJECTIVE:** THE STUDENT MUST BE ABLE TO ACCEPT CRITICISM AND/OR DIRECTION FROM EMPLOYER AND/OR THOSE IN AUTHORITY.

**TERMINAL OBJECTIVE:** Asked to explain the chain of authority in his work situation, the student will name those persons directly related to his work and state their respective positions.

COMMUNICATIVE AND FUNCTIONAL SKILLS	SUBJECT AREA	SUGGESTED METHODOLOGY	MATERIALS
1. Memory	ENGLISH	Through discussion, the teacher stresses the importance of knowing the names of the people the student is responsible to starting with the names of school administrators and teachers from whom the student receives instruction.	List of school administrators.
2. Verbal ability	1. Communication 2. Oral expression	Memory games both commercial and teacher-constructed.	Games such as "Concentration" and "EYE Guess."
3. Oral communication	SOCIAL STUDIES 1. Division of labor 2. Decision of authority 3. Relationship of worker to those in authority 4. Presentation of areas other than employment where name recall is important: i.e. social contacts, business contacts (outside student's job) military services.  Place the student in work situations. After a period of time, ask who is the boss, etc.	Materials taken from academic subject areas, i.e. History books, Science books (people-discovery)

6. GENERAL OBJECTIVE: THE STUDENT MUST BE ABLE TO ACCEPT CRITICISM AND/OR DIRECTION FROM HIS EMPLOYER AND/OR THOSE IN AUTHORITY.

BEHAVIORAL OBJECTIVE:

Presented with 5 steps of a given task in random order and given the end result of these steps the student will list the steps in a sequential or developmental order.

COMMUNICATIVE AND FUNCTIONAL SKILLS	SUBJECT AREA	SUGGESTED METHODOLOGY	MATERIALS
1. Academic skill requested for the completion of the task.	ENGLISH 1. Reading for information	The teacher should present all academic work in a step-by-step fashion. Following each step would be mandatory as part of the work task.	Wooden puzzle
2. Perceptual accuracy.	2. Comprehension	Plotting points on a graph, which, when joined, form a specific pattern or picture.	Academic work materials will constitute a large percentage of the materials used for this objective.
3. Nonverbal reasoning.	3. Oral and written.	Teacher and students discuss the importance of following directions as presented.	Graph paper
4. Visualization	SCIENCE 1. Application of scientific process	Students are given simple construction tasks which must be done in a given order. i.e. wooden puzzle obtainable at trick or magic shops.	
5. Spatial relationships.	OCCUPATIONAL EDUCATION 1. Organization of work 2. Orderliness of organization.  RELATED AREAS OF USE. 1. Mathematics 2. Spelling 3. Construction 4. Industrial Arts 5. Home Economics	Science experiments which are performable within the classroom setting, but which require step-by-step formulation for complete success.	

THE STUDENT MUST BE ABLE TO ACCEPT CRITICISM AND/OR DIRECTION FROM HIS EMPLOYER AND/OR THOSE IN AUTHORITY.

BEHAVIORAL OBJECTIVE:

When presented with a list of 15 statements of critical appraisal, told that 12 are constructive criticism, and given the criteria for constructive criticism, the student will identify at least 10.

COMMUNICATIVE AND FUNCTIONAL SKILLS	SUBJECT AREA	SUGGESTED METHODOLOGY	MATERIALS
1. Self-confidence	ENGLISH	Using teacher-made or cut-out pictures of scenes involving actions subject to criticism, the teacher and students review types of criticisms and critically analyze each picture. Present criteria for constructive criticism.	Academic subject materials
2. Emotional security	1. Vocabulary		Teacher-made posters of available pictures
3. Emotional stability.	2. Oral comprehension		
4. Nonverbal reasoning.	3. Reading for direction and comprehension	During periods of time designated for academic work, the teacher individually approaches the students, giving critical appraisal of their work. Definite suggestions must be made at this time that will improve the work out-put.	Role-playing situations as developed by teacher and/or students
5. Reaction to peers and superiors.	4. Oral language		Constitution of the U.S.A.
6. Reading for information.	SOCIAL STUDIES	Presentation of role-playing situations, Students play roles of "boss" and workers. The "boss" must use only constructive criticisms of the worker's production.	Writing to state and federal representative will render a good deal of information and materials.
7. Adaptability	1. Role of authority.		
	2. Balance of power in worker and employer relations		
	3. Responsibility of worker and employer	Presentation of the federal governmental structure and operations as regarding criticism of each branch and possibly the major parties system.	
	4. Balance of power in government.

**BEHAVIORAL OBJECTIVE:** Given a choice of 3 similar articles of merchandise and the criteria for comparison buying, that criteria being: cost vs. use and/or quality and/or quantity, the student will select the best value, as determined by the criteria.

COMMUNICATIVE AND FUNCTIONAL SKILLS	SUBJECT AREA	SUGGESTED METHODOLOGY	MATERIALS
1. Perceptual speed and accuracy	ENGLISH 1. Reading for information	The teacher either brings in samples, pictures, or descriptions of merchandise or takes the class to a store, allowing them to obtain information on a definite product. The students can also be assigned the task of calling different stores to get information on products.	Food containers
2. Numerical ability	2. Reading of comprehension	Taking the information obtained, the students collectively try to determine the best value.	Newspaper ads
3. Visualization	3. Oral communication	A class party or outing is a perfect set-up for comparison shopping expeditions. The students try to get the most for their money.	Ingredients labels
4. Spatial relationship	4. Written communication	Set up role-playing situations where the students take the role of a sales clerk and customer. The students should prepare for the roles in advance by researching a definite product.	Measuring devices: ruler, tape measure, measuring cups, etc.
5. Reading	5. Perception	Assign the students the task of either going alone or helping with the shopping for the family's weekly groceries, seeing if he can lower the cost.	Specialists in merchandising from local stores and from within the school set up, i.e. cafeteria manager.
6. Judgment	6. Listening for discrimination 7. Vocabulary MATHEMATICS 1. Measurements 2. Fractions 3. Dividing 4. Multiplying 5. Written problems.	Arithmetic problems involving cost per unit of items. Discussion and review of common units used in sale of food, clothing, and furnishings.  Value of convenience foods in time saved for other activities as opposed to less expensive similar items which need to be prepared.	

**GENERAL OBJECTIVE:** THE STUDENT EXHIBITS A WORKING KNOWLEDGE OF CONSUMER TECHNIQUES.

**BEHAVIORAL OBJECTIVE:** Presented with 1. a model budget which divides a weekly income in terms of percentages into areas of: food, clothing, shelter, medical care, transportation, insurance, entertainment, savings, and miscellaneous, 2. a definite weekly income to work with, the student will develop a budget and determine the amount of money to go into each area as stated in the model, using this total income.

COMMUNICATIVE AND FUNCTIONAL SKILLS	SUBJECT AREA	SUGGESTED METHODOLOGY	MATERIALS
1. Numerical ability	MATHEMATICS	What is a budget? Develop charts and booklet to explain what is a budget and how they are divided.	Notebooks or folders for buying guides.
2. Reading	1. Measurements 2. Interest rates 3. Charge accounts 4. Basic math processes	Present the model budget and discuss the various components and their percentage figures.	Newspaper advertisements.
3. Perceptual speed and accuracy		Discuss the variety of charge accounts, interest systems, and loan agencies.	Guest speakers as indicated.
4. Nonverbal conceptual abilities	ENGLISH	Have the students role-play the position of a person looking for a loan. The teacher should play the lender.	Role-playing situations
5. Judgement	1. Reading for information 2. Reading for comprehension	Develop a notebook dealing exclusively with buying methods. Included will be the vocabulary, types of stores, types of buying, advertisement practices, "sucker" buys, comparison shopping and sales contracts. 2. Oral communication		Divide the students into four groups, each taking one body function, and assign them the task of gathering as much information as they are able, using as their source teacher-selected magazine articles, books and film strips.	<u>A Discussion Guide For Questions About Alcohol</u>
3. Written communication	SOCIAL STUDIES	Let each group present its findings to the class as a whole. Then have the class develop lists of detrimental effects for each area discussed.  Assign each student the development of a job situation which will illustrate lowered safety or production level or a negative response from the employer. After each student presents the situation he has developed, have the class explain the illustrated situation in terms of the impairment of body functions caused by excessive alcohol consumption.	<u>Facts About Alcohol</u> R.
